Observed

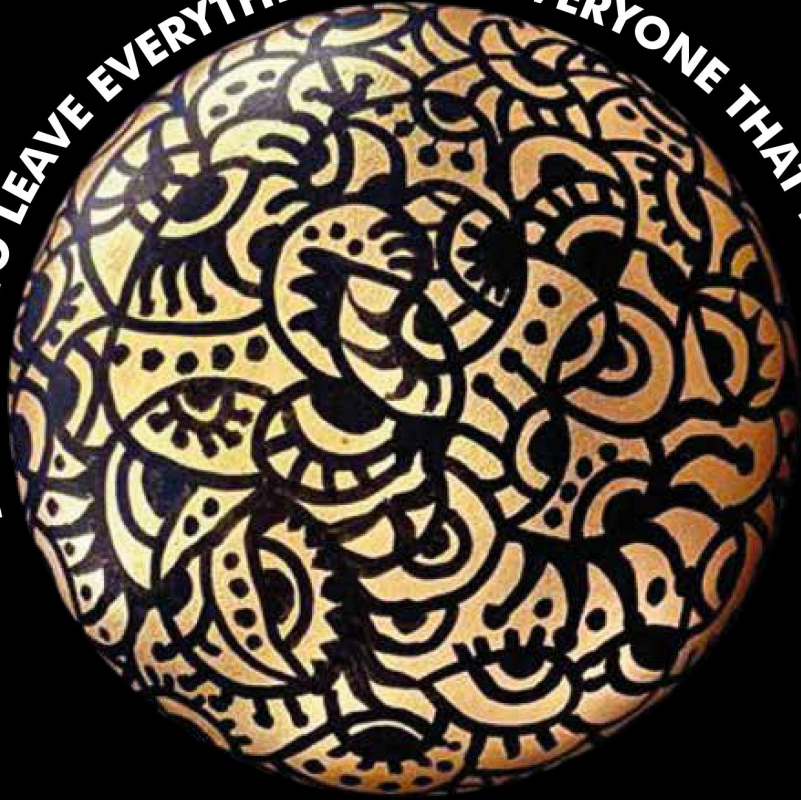

The **eye** figure, which is widely believed to protect people from evil **eyes**, has been accepted as a powerful talisman that drives away evil in many cultures and beliefs throughout history. **That's why the evil eye beads are usually in the form of eyes.** The **eye** is considered to be one's window to the world, accepted as the first starting point and symbol of all kinds of good and bad thoughts, known and unknown... This symbol, which transcends geographical boundaries and time, is a sign of our existence in this world, newly created to raise awareness in all of us.
